The Attention of Farmers is Called to this Ruke,

Complete in Construction, No Labor is Required While Rakiny. WORLD MOWER AND REAPER AND BUCYRUS BUCKEYE, The teeth of the LOCK-LEVER HARE are made of Refined Cast Steel, made expressly for the purpose. Tempered in oil; each tooth tested at the factory, and in passing over purpose. Readily Adjust Themselves to Their Places.

> 4. Steel Spring Colls, made with the body of the tooth, as these are made, have been found by use. ifold, much stronger and more durable than the small separate wire-coll springs often used in son tes. The rake can be instantly regulated for any kind of ground by lowering or elevating the test ich is done by moving the lever forecard on the past on the front cross-bar. As the tilt the rake is done by the driver's weight, only the slightest effort of the hand is required to raise as ser the lever discharging the hay. The lever being down, the rake is held firm to its place. Without Using the Hands or Feet.

The moment the leverage is unlocked the Rake is relieved of its contents. A boy ten years old can work the Rake with ease. You can Rake twenty acres per day, and save enough, usually lost from twenty-five acres of stubble, to pay for the Rake.

The Lock-Lever Hay and Grain Rake is Well Known Throughout the Eastern and Western States, and is acknowledged to be superior to all others. Those wishing to buy a Ray and Grain Rake will find it to their interest to examine the LOCK-LEVER. With it the farmer can rake his grain stubble fields as wall as his meadows.
